

Gasblock E Connector

Connector which provides gas tight seal of installed microcable coming out of microduct. The connectors shall have the necessary sealing arrangement to protect the customer premises from ingress of gas and debris. The connector assembly seals against 0.5bar pressure within the external network tube.

Technical specification

Body material:	Polycarbonate + POM
Seal material:	Nitrile + Silicone
Working pressure:	15 bars
Gas seal pressure:	0,5 bars

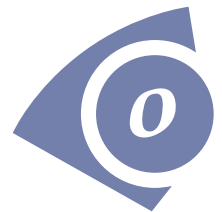

Detail specs:	YES
Installation Manual:
