

Features and Benefits

The Molex DataGate 4 Pair Termination Tool is a robust, reliable product that offers fault-less gas-tight termination of all four pairs simultaneously. The tool frame is manufactured of high grade steel with die cast termination heads. Designed specifically for use with Molex DataGate and Keystone style jacks, the 4 Pair Termination Tool Frame is supplied unloaded into which either the UTP Termination Head (for termination of the UTP DataGate and Keystone jacks) or the C6A Termination Head (for termination of the C6A shielded DataGate jacks) is fitted.

Operation is uncomplicated and efficient. The Jack is placed over the four pair cables that have been securely seated in the Termination Head. The cable wiring schematic label and jack position diagram present on the Tool Frame ensure foolproof positioning of the jack prior to termination. The Termination Head and jack are then pivoted into the cutting position, the handles depressed resulting in cables that are firmly and accurately seated and neatly trimmed, in one simple operation.

Changing the Termination Heads is easy, simply unscrew and replace. The ergonomic design of the handles provides comfortable repeat operation. Replacement Termination Heads can be purchased separately.

- Designed specifically for use with DataGate and C6A Shielded Jacks
- Simple to operate
- Cables are terminated and neatly trimmed in one operation.
- Tool Frame supplied unloaded. UTP and C6A Termination Heads supplied separately.

Technical Information

Mechanical Characteristics

Material Tool Frame: High Carbon Steel
Material Termination Head: Zamak 3

Alloy

Material Blade: High Carbon Steel
Blade Operating Life: 2000

Terminations

Handle Material: Thermoplastic Rubber

Termination Head Wire

Accommodation: 23-24 AWG solid conductors

C6A Termination Head

Cable Accommodation: F/UTP or U/FTP cables

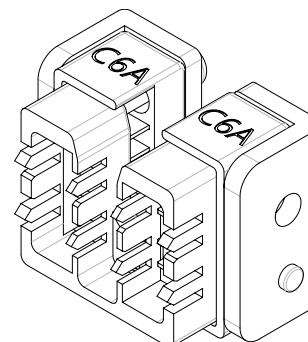

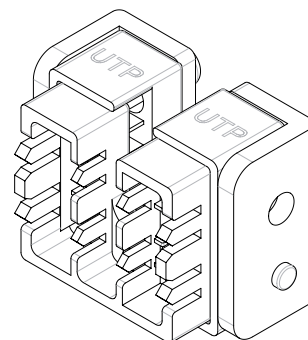

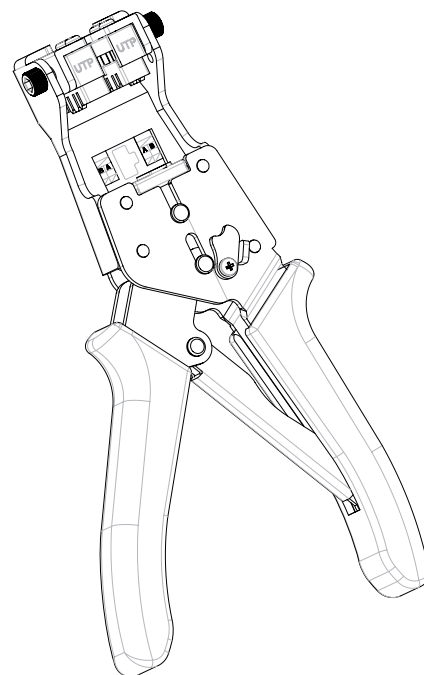

UTP Termination Head

Cable Accommodation: U/UTP cable

Shipping Weight:

part no 31.0011: 480g

part no's 31.0012 & 31.0013: 35g
